

# KTI SA2G GPS 406 MHz PLB

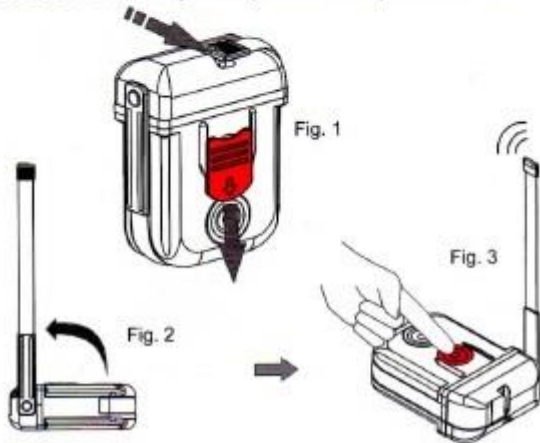

## Extract from user manuals

### INSTRUCTIONS FOR USE

The Safety Alert SA2G was designed to be operated on the ground or above the ground.

#### To Activate:

1. Slide RED protective cover downwards to access button.
2. Release antenna end-lock by sliding forward and set antenna to vertical position. (Fig. 1 & 2)
3. Press & hold RED Activation button until Green light starts flashing then release button. (Strobe light will also flash) (Fig.3)
4. Place in a clear area with antenna in vertical position or place above the ground. ie. If held by operator (ensure antenna is in the vertical position). (Fig.4).
5. Leave beacon operating continuously until rescued.
